MODEL 700

PNEUMATIC ASPHALT ROLLER

The BASIC Model 700 Rubber Tire Roller is a tried and proven machine. It features a seven wheel design for greater compaction and easy maneuverability on small job sites. The 700 is ideally suited for commercial parking lots, driveways, and subdivision streets. The simplistic design promotes longer machine life, and all-wheel independent oscillation ensures 100% surface contact, blending away seams and steel drum roller marks. The 700 provides consistent compaction across the work surface, minimizing the potential for potholes and costly warranty repairs.

Overall Dimensions:

Length: 112"
Width: 51"
Height: 74"
Wheel Base: 82"
Chassis Clearance: 9"

Weight:

1.5 to 3 Tons

Transmission:

Hydrostatic
Drive: Chain

Tire Size:

8.5-15 6Ply

Powered By:

D1105 Kubota 24.8hp T4F
Water Cooled Diesel Engine

Braking:

Drive Brake: Hydrostatic
Parking Brake: Mechanical

Pressurized Water System:

Capacity: 70 gallons
Removable Spray Tips

Steering:

Hydraulic power steering

Travel Speed:

0-6 Variable

Options:

Safety Beacon
Work Lights
Horn
Deluxe Seat
Aluminum Shade Canopy

Safety Features:

ISO Certified Folding ROPS
97 Decibel Back Up Alarm
Neutral Safety Start

MANUFACTURED BY:

Shannon Chastain Enterprises, Inc.
Eatonton, GA
